

Matte Liquid Lipstick Recipe

Phase A	INCI	Percent	Grams
Isododecane	Isododecane	51%	31
Flake Resin	Trimethylsiloxysilicate (and) Polypropylsilsesquioxane	16%	10
Dimethicone 1.5	Dimethicone	18%	11
Phase B			
Nylon 12	Nylon 12	2%	1
Silica Dimethyl Silylate	Silica Dimethyl Silylate	5%	3
Silica Microsphere	Silica	2%	1
Phase C			
Wax (either Beeswax or Sunflower Wax)	Cera Alba (Beeswax) or Helianthus Annuus (Sunflower) Seed Wax	5%	3
Preservative Cap-2	Caprylyl Glycol, Phenoxyethanol, Hexylene Glycol	2-3 drops	2-3 drops
Total		100%	60

Instructions:

1. Gather your tools and rinse with alcohol before use.
2. Weigh your ingredients.
3. Mix Phase A ingredients together. Mix until completely dissolved. This process will take 5-10 minutes.
4. Add Phase B to Phase A mixture.
5. Use spatula or Mini Mixer mix until you see no more clumps.
6. Heat Phase C to 80 degrees Celsius over a double boiler.
7. Heat Phase A+B to 70 degrees Celsius.
8. Take off heat. Add Phase A+B to Phase C with mixing.
9. Add 2 drops of Preservative Cap-2 and continue mixing until temperature reduces to 45 degrees Celsius (warm to the touch).
10. Transfer the base into a zip lock bag.
11. Snip off the corner and fill in air tight containers.

To color your creation, add about 1.5 of powdered dye and about 0.3 grams of titanium dioxide (prewetting with Dimethicone 1.5 is recommended) and to about 9 grams of uncolored base. This will make one full-sized lip gloss.
