Safety Data Sheet — True Red/Orange

Revision Date: 15-Nov-2026 **Revision No.:** 1

Transport Symbol	WHMIS	NFPA	Personal Protective Equipment
Not controlled	Not controlled		

SECTION 1: Identification

Product Name: True Red/Orange

INCI Name: Mica, Titanium Dioxide (CI 77891), red colorant (to be confirmed)

Synonyms: red mica-based effect pigment

Intended Use: Cosmetic ingredient (color / effect pigment).

Restrictions on Use: Not for food use. Use in eye-area and lip products to be confirmed (identity and FDA color-additive status of the red colorant to be confirmed; see Section 15).

Supplier: TKB Trading, LLC | 939 E 11th St, Oakland, CA 94606

Email: support@tkbtrading.com

Website: www.tkbtrading.com

Emergency Number: TKB Trading: 510-451-9011 (business hours) | Poison Control (US): 1-800-222-1222 (24/7)

Standard: OSHA HazCom 29 CFR 1910.1200 (HazCom 2024) / GHS Rev 7

SECTION 2: Hazards Identification

GHS Classification: Not classified.

Hazard Pictograms: None required.

Signal Word: None

Hazard Statements: None required.

Precautionary Statements: None required. Good practice: avoid breathing dust; avoid dust generation; wash hands after handling.

Hazards Not Otherwise Classified (HNOC): May form combustible dust concentrations in air if finely dispersed (organic colorant content). Dust may cause mechanical irritation of the eyes, skin, nose and throat.

Other Hazards: Contains titanium dioxide: IARC Group 2B (possibly carcinogenic to humans) by inhalation of respirable dust; not relevant when bound in a finished cosmetic product.

SECTION 3: Composition / Ingredients

Substance / Mixture: Mixture (effect pigment).

Ingredient (INCI)	CAS No.	Weight %	GHS-US Classification
Mica	12001-26-2	25 – 50	Not classified
Titanium Dioxide (CI 77891)	13463-67-7	25 – 50	Not classified
Red colorant (to be confirmed)	Not disclosed	Balance	Not classified

No ingredient is classified as hazardous under 29 CFR 1910.1200. Concentration ranges are given to protect confidential business information or reflect batch variation. Trace benzoic acid (65-85-0) may be present.

SECTION 4: First Aid Measures

Inhalation: If difficulties occur after dust has been inhaled, move to fresh air and get medical attention.

Skin Contact: Remove contaminated clothing. Wash skin thoroughly with soap and water.

Eye Contact: Remove contact lenses, if present and easy to do. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Get medical advice if irritation persists.

Ingestion: Rinse mouth with water. Do not induce vomiting. Get medical advice if you feel unwell.

Symptoms: Dust above exposure limits may cause irritation of the eyes, nose, throat and lungs (redness, coughing).

Medical Attention: Treat symptomatically.

SECTION 5: Firefighting Measures

Suitable Media: Dry chemical, carbon dioxide (CO_2), water spray (fog) or foam.

Unsuitable Media: Do not use a water jet — may disperse dust.

Special Hazards: Product itself is not flammable, but fine dust dispersed in air may form combustible dust concentrations. Avoid dust clouds near ignition sources. Decomposition products may include carbon monoxide, carbon dioxide, nitrogen oxides, sulfur oxides and metal oxides.

Firefighter PPE: Wear self-contained breathing apparatus (SCBA) with full face-piece in positive-pressure mode and protective clothing.

SECTION 6: Accidental Release Measures

Personal Precautions: Avoid breathing dust and avoid dust generation. Wear protective equipment (see Section 8).

Environmental: Avoid dispersal of spilled material and contact with soil, waterways, drains and sewers.

Containment and Cleanup: Vacuum (HEPA) or carefully sweep up material without creating dust and place in a labeled waste container. Dispose of according to Section 13.

SECTION 7: Handling and Storage

Safe Handling: Avoid breathing dust and minimize dust generation. Keep away from ignition sources where dust may be dispersed; ground equipment when handling large quantities. Do not eat, drink or smoke in work areas. Wash hands and face after handling.

Storage: Store in a dry, cool, well-ventilated area away from heat and direct sunlight. Keep container tightly closed; reseal opened containers carefully.

Incompatible Materials: Strong oxidizing agents.

SECTION 8: Exposure Controls / Personal Protection

Component (CAS No.)	OSHA PEL (TWA)	ACGIH TLV (TWA)	NIOSH REL (TWA)
Mica (12001-26-2)	20 mppcf (Z-3)	0.1 mg/m³ (respirable)	3 mg/m³ (respirable)
Titanium dioxide (13463-67-7)	15 mg/m³ (total dust)	2.5 mg/m³ (fine-scale, respirable); 0.2 mg/m³ (nanoscale, respirable)	2.4 mg/m³ (fine); 0.3 mg/m³ (ultrafine); potential occupational carcinogen

Engineering Controls: Use with adequate ventilation. Where dust is generated, use local exhaust ventilation or process enclosure to keep exposure below the limits above. Eyewash station recommended.

Eye Protection: Safety glasses with side shields; dust goggles where dust levels are high.

Hand and Skin Protection: Protective gloves (e.g., nitrile); suitable work clothing.

Respiratory: Where dust exceeds exposure limits or ventilation is inadequate, use a NIOSH-approved particulate respirator (N95 or better) as part of a program meeting 29 CFR 1910.134.

Hygiene Measures: Wash hands, forearms and face after handling and before eating, drinking or smoking. Wash contaminated clothing before reuse.

SECTION 9: Physical and Chemical Properties

Physical State / Appearance: Solid powder

Color: Red

Odor: Almost odorless

Odor Threshold: Not available

pH: 3 – 7 (4% w/w aqueous suspension)

Melting Point: > 1,000 °C (> 1,832 °F)

Boiling Point / Range: Not available

Flash Point: Not available

Flammability: Not flammable (may form combustible dust concentrations in air)

Explosion Limits (Lower / Upper): Not available

Vapor Pressure: Not available

Vapor Density: Not available

Bulk Density: 260 kg/m³

Solubility in Water: Insoluble (cold and hot water)

Partition Coefficient (n-octanol/water): Not available

Autoignition Temperature: Not available

Decomposition Temperature: Not available

Viscosity: Not available

VOC Content: 0%

Self-Heating: Not capable of spontaneous heating.

SECTION 10: Stability and Reactivity

Reactivity: Not reactive under normal conditions of use.

Chemical Stability: Stable.

Hazardous Reactions: Will not occur under normal conditions of storage and use.

Conditions to Avoid: Dust generation and accumulation; ignition sources near dust clouds.

Incompatible Materials: Strong oxidizing agents.

Hazardous Decomposition Products: None under normal conditions. In case of fire: carbon oxides, nitrogen oxides, sulfur oxides, metal oxides.

SECTION 11: Toxicological Information

Likely Routes of Exposure: Inhalation of dust, eye contact, skin contact.

Acute Toxicity: Not classified. Product: oral LD50 > 5,000 mg/kg (rat). Titanium dioxide: oral LD50 > 5,000 mg/kg (rat); dermal LD50 > 10,000 mg/kg (rabbit).

Skin Corrosion/Irritation: Not classified. Product: non-irritant (rabbit).

Serious Eye Damage/Irritation: Not classified. Product: non-irritant (rabbit). Dust may cause mechanical irritation.

Respiratory or Skin Sensitization: Not classified. Product: not sensitizing (guinea pig).

Germ Cell Mutagenicity: Not classified.

Carcinogenicity: Not classified. Titanium dioxide: IARC Group 2B (possibly carcinogenic to humans, inhalation of respirable dust). Not listed by NTP or OSHA.

Reproductive Toxicity: Not classified.

STOT — Single / Repeated Exposure: Not classified. Prolonged or repeated inhalation of dust may cause chronic respiratory irritation.

Aspiration Hazard: Not applicable (solid).

SECTION 12: Ecological Information

Ecotoxicity: Product: fish LC50 (96 h) > 100 mg/L. No negative ecological effects expected.

Persistence/Degradability: Inorganic, insoluble pigment; can be separated from water mechanically in effluent treatment.

Bioaccumulative Potential: Low (titanium dioxide BCF 19 – 352).

Mobility in Soil: Insoluble; low mobility expected.

Other Adverse Effects: No known significant effects.

SECTION 13: Disposal Considerations

Waste Disposal Method: Dispose of in accordance with local, state and federal regulations via a licensed waste disposal contractor. Do not discharge to sewers or waterways.

Contaminated Packaging: Empty containers may retain product residue. Recycle or dispose of according to official regulations.

SECTION 14: Transport Information

UN Number: Not regulated (DOT / TDG / IMDG / IATA).

UN Proper Shipping Name: Not regulated.

Transport Hazard Class: Not regulated.

Packing Group: Not regulated.

Environmental Hazards: No. Not a marine pollutant.

SECTION 15: Regulatory Information

US Federal Regulations: Not a hazardous chemical under OSHA HazCom 2024 (29 CFR 1910.1200). TSCA 8(b): listed. SARA 311/312 hazard categories: None. SARA 313: none identified. Clean Water Act 311: benzoic acid (trace).

US State Regulations: California Proposition 65: WARNING — this product can expose you to titanium dioxide (airborne, unbound particles of respirable size), which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

Cosmetic Use (US FDA): Mica (21 CFR 73.2496) and titanium dioxide (21 CFR 73.2575) are color additives exempt from certification. The identity and FDA status of the red colorant are to be confirmed; if it is a certified color (e.g., D&C Red No. 7 Calcium Lake), batch certification and its use restrictions (e.g., not for the eye area) apply.

International Inventories: Canada DSL, Australia AIIC, China IECSC, Japan CSCL, Korea KECI, New Zealand NZIoC, Philippines PICCS, Taiwan TCSI: all components listed or exempted. Toxics in Packaging (CONEG): in compliance.

SECTION 16: Other Information

Indication of Changes: Issued in 16-section GHS format aligned to OSHA HazCom 2024 / GHS Rev 7.

Revision No. / Date: 1 / 15-Nov-2026

NFPA Rating: Health: 1 | Flammability: 0 | Instability: 0

HMIS Rating: Health: 1 | Flammability: 0 | Physical Hazard: 0

This data is based on information believed to be reliable. No warranty, express or implied, is made regarding the accuracy or results obtained from the use of such information. It is the end-user's responsibility to assure compliance with all local, federal, and global regulations regarding the storage, use, and disposal of this product.
