

HOT LIPS- Mini Melt and Pour Lipstick Kit

You will need to provide a clean surface to work on, some rubbing alcohol to clean your tools and container, a microwave for melting the lipstick base.

Basic Instructions are:

- Cut each "pie" of color into eight pieces, just as you would slice a pie.
- Melt together in a melter cup a total of 4-5 "pieces" of lipstick, of any assorted colors
- Use a microwave for melting, and melt in short bursts of no more than 20 seconds until you become familiar with the process. The melter cups are microwaveable for short periods of time, but they will melt if you overheat them.
- Add powdered mica to change the color, as you wish, up to ten scoops is fine.
- Reheat if necessary prior to pouring into the container
- Just prior to pouring into the container, add 1-4 drops of flavoring oil and stir well.
- The lippies will harden and be ready for use within 10 minutes!

Extra Instructions, tips and warnings are:

- Clean all utensils and containers with rubbing alcohol prior to and during use to assure that your products are clean and safe for cosmetic purposes.
- Do not microwave Black Basics together with lipstick bases for more than 10 seconds, as Black Basics burns if heated too long. Instead, microwave in 10 second bursts until it is fully mixed in.
- The Lip Liquid White Pigment does not blend easily with the lipstick bases if you microwave them all together. We suggest you first microwave the lipstick bases for 10-15 seconds, then add the Lip Liquid White Pigment drop-by-drop as you stir. Stir well and reheat if necessary. The Lip Liquid White Pigment will sink to the bottom of the container if it is not stirred into the bases in this manner.
- The Melter Cups can withstand the heat of the microwave in 20 second or so bursts. However, do not overheat them as they will melt and your lipstick will spill all over the inside of the microwave. Handle every hot element with care and use normal caution when working with these products.
- Do not allow children to work with the products unsupervised.

How to work the kit:

You may simply melt together the things that you like, and keep it easy, or you can visit our website and view over 100 recipes online. If you work with a recipe, here are the steps you would take:

Capricious: A pretty pink with medium coverage and sheen, designed by "Susanne"

2g Bittersweet (2 pieces)

2g Bonjour (2 pieces)

0.50 Pearl Basics (1 scoop)

0.50 Gold Basics (1 scoop)

1. Clean all utensils and containers with rubbing alcohol.
2. Cut each pie (Bittersweet and Bonjour) into eight (8) pieces with the spatula provided in the kit (you may also use a kitchen knife).
3. Put the pieces (2 pieces Bittersweet and 2 pieces Bonjour) into the melter cup (clear oval cup).
4. Heat the lipstick bases in the Melter Cup for about 10-20 seconds until everything melts into a liquid.
5. Add scoops of micas (Pearl Basics and Gold Basics) and stir.

6. Reheat the Melter Cup (about 10-15 seconds) if the mixture starts to solidify.
7. Pour the melted lipstick into one of the wells of the 5-well Wheel 'O What container.
8. The product is ready to use in just a few minutes (when cool). Put the wheel in the freezer to speed up the process.
9. Repeat until all five wells of the wheel are filled with color!

MY MIX COSMETICS LIPPIE RECIPES

The following recipes are formulated using the five highly pigmented and qualified pre-made Hot Lips lipstick colors. Also used in these recipes are various micas and texturizers, including: Gold Basics, Red Basics, Bronze Basics, Black Basics, and Liquid White Pigment.
