

SAFETY DATA SHEET

TKB Professional Lip Base (Versagel ME)

SECTION 1: Identification of the Substance/Mixture and of the Company/Undertaking

1.1 Product identifier

Product name	TKB Professional Lip Base (Versagel ME)
Product shelf life	3 years from manufacturing date
Product description	Liquid gel
Other means of identification	Not available.

1.2 Relevant identified uses of the substance or mixture and uses advised against

Not applicable.

1.3 Details of the supplier of the safety data sheet

Supplier	TKB Trading
Address	939 E 11th St, Oakland, CA 94606
Website	www.tkbtrading.com
Email	support@tkbtrading.com

1.4 Version information

Date of issue / revision	06/17/2026
Date of previous issue	No previous validation.
Version	1

SECTION 2: Hazards Identification

2.1 Classification of the substance or mixture

Product definition	Mixture
Classification according to Directive 1999/45/EC [DPD]	— Europe: the product is not classified as dangerous according to Directive 1999/45/EC and its amendments.
Classification	Not classified.
See Section 16 for the full text of the R phrases or H statements declared above. See Section 11 for more detailed information on health effects and symptoms.	

2.2 Label elements

Europe

Risk phrases	This product is not classified according to EU legislation.
---------------------	---

Safety phrases	Not applicable.
Supplemental label elements	Not applicable.
Annex XVII – Restrictions on manufacture, placing on the market, and use of certain dangerous substances, mixtures, and articles	Not applicable.

2.3 Other hazards

Other hazards which do not result in classification	None known.
--	-------------

SECTION 3: Composition / Information on Ingredients

Substance/mixture	Mixture
There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs, or have been assigned a workplace exposure limit, and hence require reporting in this section.	

SECTION 4: First Aid Measures

4.1 Description of first aid measures

Eye contact	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
Skin contact	Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.
Ingestion	Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training.

4.2 Most important symptoms and effects, both acute and delayed

Potential acute health effects

Eye contact	No known significant effects or critical hazards.
Inhalation	No known significant effects or critical hazards.
Skin contact	No known significant effects or critical hazards.
Ingestion	No known significant effects or critical hazards.

Over-exposure signs/symptoms

Eye contact	No specific data.
Inhalation	No specific data.
Skin contact	No specific data.
Ingestion	No specific data.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	No specific treatment.

SECTION 5: Firefighting Measures

5.1 Extinguishing media

Suitable extinguishing media	Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	None known.

5.2 Special hazards arising from the substance or mixture

Hazards from the substance or mixture	In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous thermal decomposition products	Decomposition products may include the following materials: carbon dioxide, carbon monoxide.

5.3 Advice for firefighters

Special protective actions for fire-fighters	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental Release Measures

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.
For emergency responders	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also Section 8 for additional information on hygiene measures.

6.2 Environmental precautions

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

6.3 Methods and materials for containment and cleaning up

Small spill	Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor.

6.4 Reference to other sections

See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.

SECTION 7: Handling and Storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

7.1 Precautions for safe handling

Protective measures	Put on appropriate personal protective equipment (see Section 8).
Advice on general occupational hygiene	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

7.3 Specific end use(s)

Recommendations	Not available.
Industrial sector specific solutions	Not available.

SECTION 8: Exposure Controls / Personal Protection

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

8.1 Control parameters

Occupational exposure limits – Europe	No exposure limit value known.
Recommended monitoring procedures	If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as EN 689 (Workplace atmospheres – Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy), EN 14042 (Workplace atmospheres – Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents), and EN 482 (Workplace atmospheres – General requirements for the performance of procedures for the measurement of chemical agents). Reference to national guidance documents for methods for the determination of hazardous substances will also be required.
DNELs/DMELs	No DNELs/DMELs available.
PNECs	No PNECs available.

8.2 Exposure controls

Appropriate engineering controls	No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.
Individual protection measures	
Hygiene measures	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. If contact is possible, safety glasses with side-shields should be worn, unless the assessment indicates a higher degree of protection.
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
Body protection	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 9: Physical and Chemical Properties

9.1 Information on basic physical and chemical properties

Physical state	Liquid (gel)
Color	Clear, colorless.
Odor	Odorless.
Odor threshold	Not available.
pH	Not available.
Melting point/freezing point	Not available.
Initial boiling point and range	100°C
Flash point	Open cup: >200°C
Evaporation rate	Not available.
Flammability (solid, gas)	Not available.
Burning time / burning rate	Not applicable.
Upper/lower flammability or explosive limits	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	0.827
Solubility(ies)	Insoluble in cold water and hot water.
Solubility in water	Not available.
Partition coefficient (n-octanol/water)	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Kinematic (40°C): >0.25 cm²/s
Explosive properties	Not available.
Oxidizing properties	Not available.

9.2 Other information

No additional information.

SECTION 10: Stability and Reactivity

10.1 Reactivity	No specific test data related to reactivity available for this product or its ingredients.
10.2 Chemical stability	The product is stable.
10.3 Possibility of hazardous reactions	Under normal conditions of storage and use, hazardous reactions will not occur.
10.4 Conditions to avoid	No specific data.
10.5 Incompatible materials	No specific data.
10.6 Hazardous decomposition products	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11: Toxicological Information

11.1 Information on toxicological effects

Acute toxicity – conclusion/summary	Not available.
Acute toxicity estimates	Not available.
Irritation/corrosion – conclusion/summary	Not available.
Sensitization – conclusion/summary	Not available.
Mutagenicity – conclusion/summary	Not available.
Carcinogenicity – conclusion/summary	Not available.
Reproductive toxicity – conclusion/summary	Not available.
Teratogenicity – conclusion/summary	Not available.
Information on the likely routes of exposure	Not available.

Potential chronic health effects

Conclusion/Summary	Not available.
General	No known significant effects or critical hazards.
Carcinogenicity	No known significant effects or critical hazards.
Mutagenicity	No known significant effects or critical hazards.
Teratogenicity	No known significant effects or critical hazards.
Developmental effects	No known significant effects or critical hazards.

Fertility effects	No known significant effects or critical hazards.
Other information	Not available.

SECTION 12: Ecological Information

12.1 Toxicity – conclusion/summary	Not available.
12.2 Persistence and degradability – conclusion/summary	Not available.
12.3 Bioaccumulative potential	Not available.
12.4 Soil/water partition coefficient (K_{oc})	Not available.
12.4 Mobility	Not available.
12.5 PBT	Not applicable.
12.5 vPvB	Not applicable.
12.6 Other adverse effects	No known significant effects or critical hazards.

SECTION 13: Disposal Considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

13.1 Waste treatment methods

Product

Methods of disposal	The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.
Hazardous waste	Within the present knowledge of the supplier, this product is not regarded as hazardous waste, as defined by EU Directive 91/689/EEC.

Packaging

Methods of disposal	The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.
Special precautions	This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

SECTION 14: Transport Information

	ADR/RID	ADN	IMDG	IATA
14.1 UN number	Not regulated.	Not regulated.	Not regulated.	Not regulated.
14.2 UN proper shipping name	–	–	–	–
14.3 Transport hazard class(es)	–	–	–	–
14.4 Packing group	–	–	–	–
14.5 Environmental hazards	No.	No.	No.	No.
14.6 Additional information	–	–	–	–

14.6 Special precautions for user

Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

14.7 Transport in bulk (Annex II of MARPOL 73/78 and the IBC Code)

Not available.

SECTION 15: Regulatory Information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture EU Regulation (EC) No. 1907/2006 (REACH)

Annex XIV – substances of very high concern

None of the components are listed.

Annex XVII – restrictions on manufacture, placing on the market, and use of certain dangerous substances, mixtures, and articles

Not applicable.

Other EU regulations

Europe inventory

All components are listed or exempted.

Seveso II Directive

This product is not controlled under the Seveso II Directive.

National regulations

Austria – limitation of the use of organic solvents

Permitted.

Denmark – MAL-code

00-1

Denmark – protection based on MAL

According to the regulations on work involving coded products, the following stipulations apply to the use of personal protective equipment.

General: Gloves must be worn for all work that may result in soiling. Apron/coveralls/protective clothing must be worn when soiling is so great that regular work clothes do not adequately protect skin against contact with the product. A face shield must be worn in work involving spattering if a full mask is not required; in that case, other recommended use of eye protection is not required. In all spraying operations where there is return spray, respiratory protection and arm protectors/apron/coveralls/protective clothing must be worn as appropriate or as instructed. **Application (MAL-code 00-1):** When spraying in existing spray booths where the operator is outside the spray zone, arm protectors must be worn. During spraying where atomization occurs in cabins or spray booths with the operator inside the spray zone, and during spraying outside a closed facility, cabin, or booth, a full mask with combined filter, coveralls, and hood must be worn. **Drying:** items placed on racks/trolleys for drying must be equipped with a mechanical exhaust system to prevent fumes from passing through workers' inhalation zone. **Polishing:** a mask with dust filter must be worn; eye protection must be worn when machine grinding; work gloves must always be worn. The regulations contain other stipulations in addition to the above — see Regulations.

Finland – NACE / UC62

Not available.

France – reinforced medical surveillance

Act of July 11, 1977 determining the list of activities which require reinforced medical surveillance: not applicable.

Germany – hazard class for water

2, Appendix No. 4

Germany – TA-Luft technical instruction on air quality control

Number 5.2.5: 92%

Italy – D.Lgs. 152/06

Not classified.

Netherlands – Water Discharge Policy (ABM)

Slightly harmful to aquatic organisms. Contains substances that are harmful to the aquatic environment. Abatement effort: A

Switzerland – VOC content

Liberated.

15.2 Chemical Safety Assessment

This product contains substances for which Chemical Safety Assessments are still required.

SECTION 16: Other Information

Abbreviations and acronyms

ATE = Acute Toxicity Estimate • CLP = Classification, Labelling and Packaging Regulation [Regulation (EC) No. 1272/2008] • DMEL = Derived Minimal Effect Level • DNEL = Derived No Effect Level • EUH statement = CLP-specific Hazard statement • PBT = Persistent, Bioaccumulative and Toxic • PNEC = Predicted No Effect Concentration • RRN = REACH Registration Number • vPvB = Very Persistent and Very Bioaccumulative

Classification per Regulation (EC) No. 1272/2008 Not classified.
[CLP/GHS]

Classification	Justification
Not classified.
